## Abstract

Abstract should be 150-200 words and need not be the same as the one submitted previously on the web site. You need to keep a space more than 2 cm to the left of the title for manuscript numbering by our office. The Algerian Materials Research Society (AMRS) will hold the 4th CISGM (2006) Conference at the Abou bakr Belkaid University, Tlemcen Algeria on May 2-4, 2006. The Algerian Journal of Advanced Materials is publishing a proceedings of oral and poster presentations at the conference. All authors are requested to submit a camera-ready manuscript for publication in this proceedings in the form described below. This proceedings will be delivered to all registrants at the reception desk of the conference for a special price of 2000 DA. Please download this MS-Word template of the extended abstract from for a preparation of proceedings. Abstract should be 150-200 words and need not be the same as the one submitted previously on the web site. You need to keep a space more than 2 cm to the left of the title for manuscript numbering by our office. The Algerian Materials Research Society (AMRS) will hold the 4th CISGM (2006) Conference at the Abou bakr Belkaid University, Tlemcen Algeria on May 2-4, 2006.

## 1. General Instruction

Divide your paper into sections (or subsections, if necessary), and format it by the headings. Use bold letter for each heading with a heading number, and align each heading to the left. Heading is independent short paragraph. Subsection headings are same as section headings, but they are not bold face. Each author must prepare a camera-ready manuscript and lay it out within 4 pages with black and white figures, halftone figures and/or tables in place.

The proceedings will be produced by a photo-offset process directly from the pages supplied by the authors. Please check your paper carefully when sending the final camera-ready manuscript. The way you submit your manuscript is the way you will see it in print. The guidelines of camera-ready manuscript are described below.

## 2. Page, Size and Text Area

AJAM<sup>1</sup> The printed page size of the proceedings will be B5 (182 x 257 mm). Authors can use standard A4 (210 x 297 mm) stationery for printing camera-ready paper. Page margins should be 18 mm on the top and bottom,

and 15 mm both sides. Pages will be reduced to the B5 size in the printing process.

### 2.1. Title, Author(s) and Affiliation(s)

Use flush left for Title, author(s) and affiliation(s) in FULL TEXT WIDTH. Title must appear first, written in bold face and font size 14 pt. MAKE ONE LINE SPACE after title. Author's names are written in an order: given name, middle name, and surname. If an author has middle name, write only an initial for either first or middle name. Use font size 12 pt for author's name and 11 pt for affiliation. You do not have to use bold face for author's name. Affiliation(s) follow after author(s). If authors affiliations are different, use numbers for indicating each author's affiliation. Numbers are superscripted and located at the end of each author's name. Superscripted numbers are located at the head of each corresponding affiliation. Add a superscript asterisk at the end of the speakers name. Author(s) and affiliation(s) should be center aligned and written in full text width. MAKE ONE LINE SPACE between affiliation and the abstract.

Full papers contain original scientific work that has not been published previously. However, work that has appeared in print in a short form such as a communication is acceptable. Please note that the Society strongly discourages the fragmentation of a substantial body of work into a number of short publications. Full papers contain
